

# TRIPLE CHOICE

Now, The Choice is Yours!

Sawyer Industrial Plastics, Inc. has distribution all over the world supplying many different paper machines. Many customers only want the best in suction roll packaging, but have to deal with the realities of a budget. With that in mind we introduced a "TRIPLE CHOICE in Suction Roll Seal Strips." Three material that give you a choice in packing!

## Polytron® K-2

MANUFACTURED SINCE 1983!

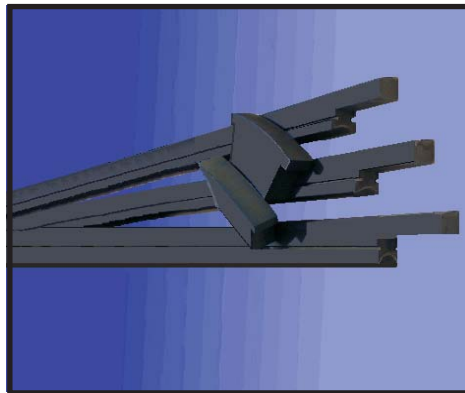

The K-2 material is for mills that only want the best. K-2 has the advantage of the patented Teflon® Lubricator Bar to REDUCE ENERGY CONSUMPTION, to assure a good fit, to add lubrication, and to act as a built in wear gauge.

## Polytron® A-2

NEW GENERATION OF COMPOSITE GRAPHITES

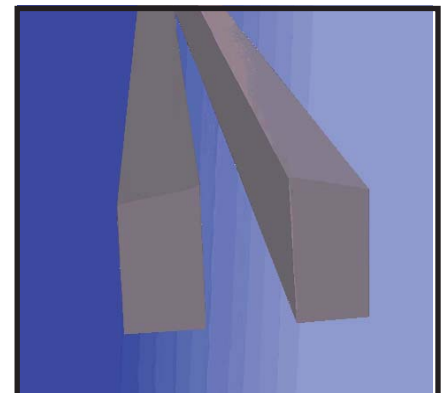

The Polytron® A-2 material is for mills and roll rebuilders that want a quality product at a competitive price. This material has done a superior job handling longer, faster machines at a lower price for competitive situations.

## Polytron® P

THE REBUILDER'S CHOICE

Polytron® P was designed for roll mills that must buy based on price. This material is an excellent choice when compared to rubber graphite and has been used and produced for years for large OEM's. Still the Polytron Quality, Still the Polytron Guarantee!

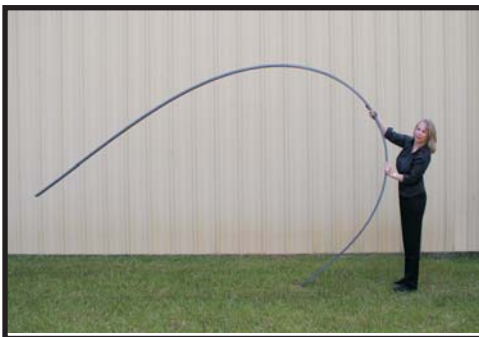

**Won't Break...**

**Won't Swell...**

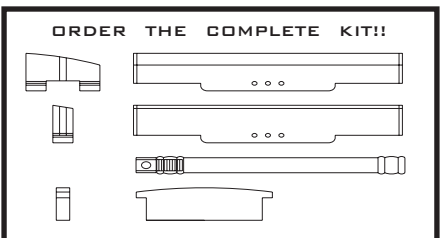

**Won't Wear Out The Shell...**

**Never Has...Never Will!!**

- Flexible
- Not brittle
- Easy to install
- Fiber reinforced
- A competitive value
- Lightweight in handling
- Excellent Wear Properties
- Guaranteed 24-hour shipping available
- Contains graphite for internal lubricity
- Material resistant to harsh chemicals
- Base material is strong

\*\*The Teflon® Lubricator Bar can be installed in all Polytron Products.

### Ask about our "Seal Strip Performance Analysis"

This program was designed to maximize the efficiency of the seal strips inside the suction roll. We follow the performance of our strips every step of the way. Literally. We're in touch with you after you've received and installed our product, then again at the end of the cycle. We follow-up with a final report to you.

*We want to make sure you get the most value out of our products.*
