

Polytron® P

The Competitive Choice

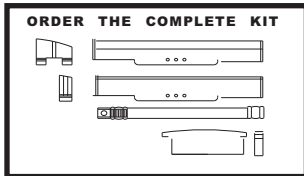

Material Advantages

- Flexible
- Not brittle
- Waterproof
- Lightweight
- Easy to install
- Competitive value
- Internal lubrication
- Strong base material
- Will not wear the shell
- Low coefficient of friction
- Excellent wear properties
- Chemical Resistant
- Easy to machine

Water Proof Weather Proof Wear Proof UV Proof

From the most experienced manufacturer of seals strips... Polytron® A-2 is the new generation of Composite materials! The raw materials used in our manufacturing process resist the hot, harsh water environment of the suction rolls.

Polytron® Products have proven to be the most energy efficient and the most reliable strips made in the world!!!

Polytron® Products are designed for budget situations
