

ToughLON™

Material Innovation!

ToughLON™ is the newest generation of materials. It is the next advancement in materials technology and the most significant change in seal strip materials for over 30 years! The homogenous material has the flexibility needed for installation and during use but has shown a much longer wear life than the graphite materials!

Sawyer continues to solve problems for paper mills all over the world!

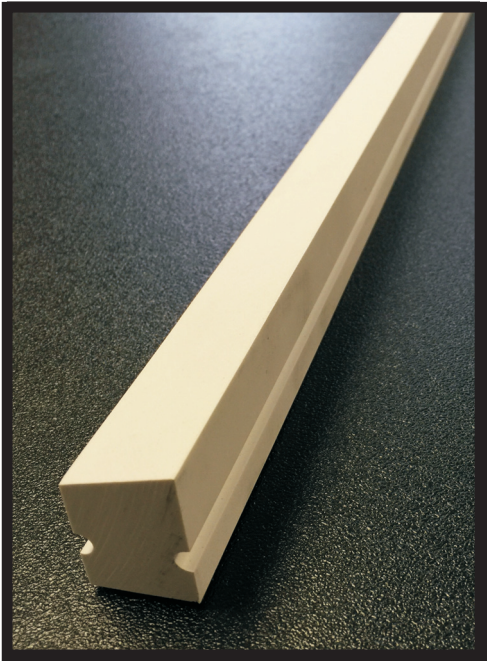

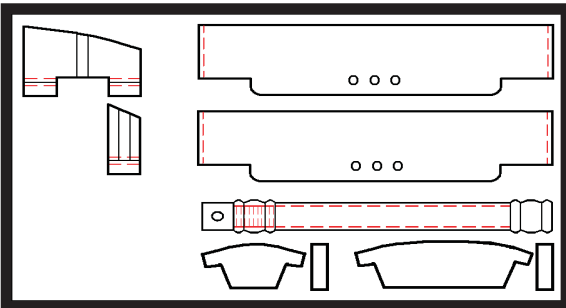

The Sawyer Guarantee:

Customer satisfaction is important to us. We offer an unconditional guaranteed. It is our job to not just sell you materials, but to help solve your problems.

- Strong
- Flexible
- Easy to install
